

# Revamped Vases

Empty wine bottles and glass jars take on an entirely new look when coated in your favorite color. Fill them with festive floral arrangements and winter berries to bring the season into your home. Pick a color that matches your décor to make use of these unique vessels year round.

## You Will Need:

### From Savers/Value Village

- Empty bottles in assorted shapes (wine and milk bottle shapes work best)
- Faux sprigs or interesting floral stems (you can also use natural twig branches – painted to the desired colors – or faux stems, berries or flowers from the craft store)

### Other supplies

- Spray paint in desired colors (soft whites and grey shades pair great with red berry twigs for a chic look)

## Directions:

- 1) Clean and dry bottles.
- 2) Spray paint bottle with several coats of desired color to cover bottle. Allow each coat to dry before you spray the next.
- 3) Arrange stems and/or flower accents in the bottles as desired.
